SMARTCHAIR FLOW

SmartChair Flow is an electric wheelchair designed for those who want to combine smooth mobility with smart features and easy transport. With its compact design, flexible construction, and well-thought-out details, it provides a comfortable and safe driving experience both indoors and outdoors.

Every part is designed with the user in mind—from adjustable features and ergonomic seating comfort to easy folding and smooth handling in everyday use. SmartChair Flow gives you the freedom to move more, go further, and adapt your journey to your needs.

Specifications

Weight	23 kg without battery / 25 kg gross
Seat width: SmartChair Flow Mini	42 cm, total 56 cm
Seat width: SmartChair Flow	46 cm, total 60 cm
Backrest angle	Fixed 11°
Adjustable footplate with height adjustment	Yes
Speed	6 km/h
Max driving range	25 km
Max load capacity	136 kg
Maximum climbing ability	10°
Charging time	6–7 hours
Battery type	Lithium Ion 24V 12Ah, 288Wh
Nominal power	2 × 250W brushless motors
Front wheels	8"
Rear wheels	10" PU wheels
CE marking	According to MDR 2017/745 class 1

Sleek construction developed for an active life

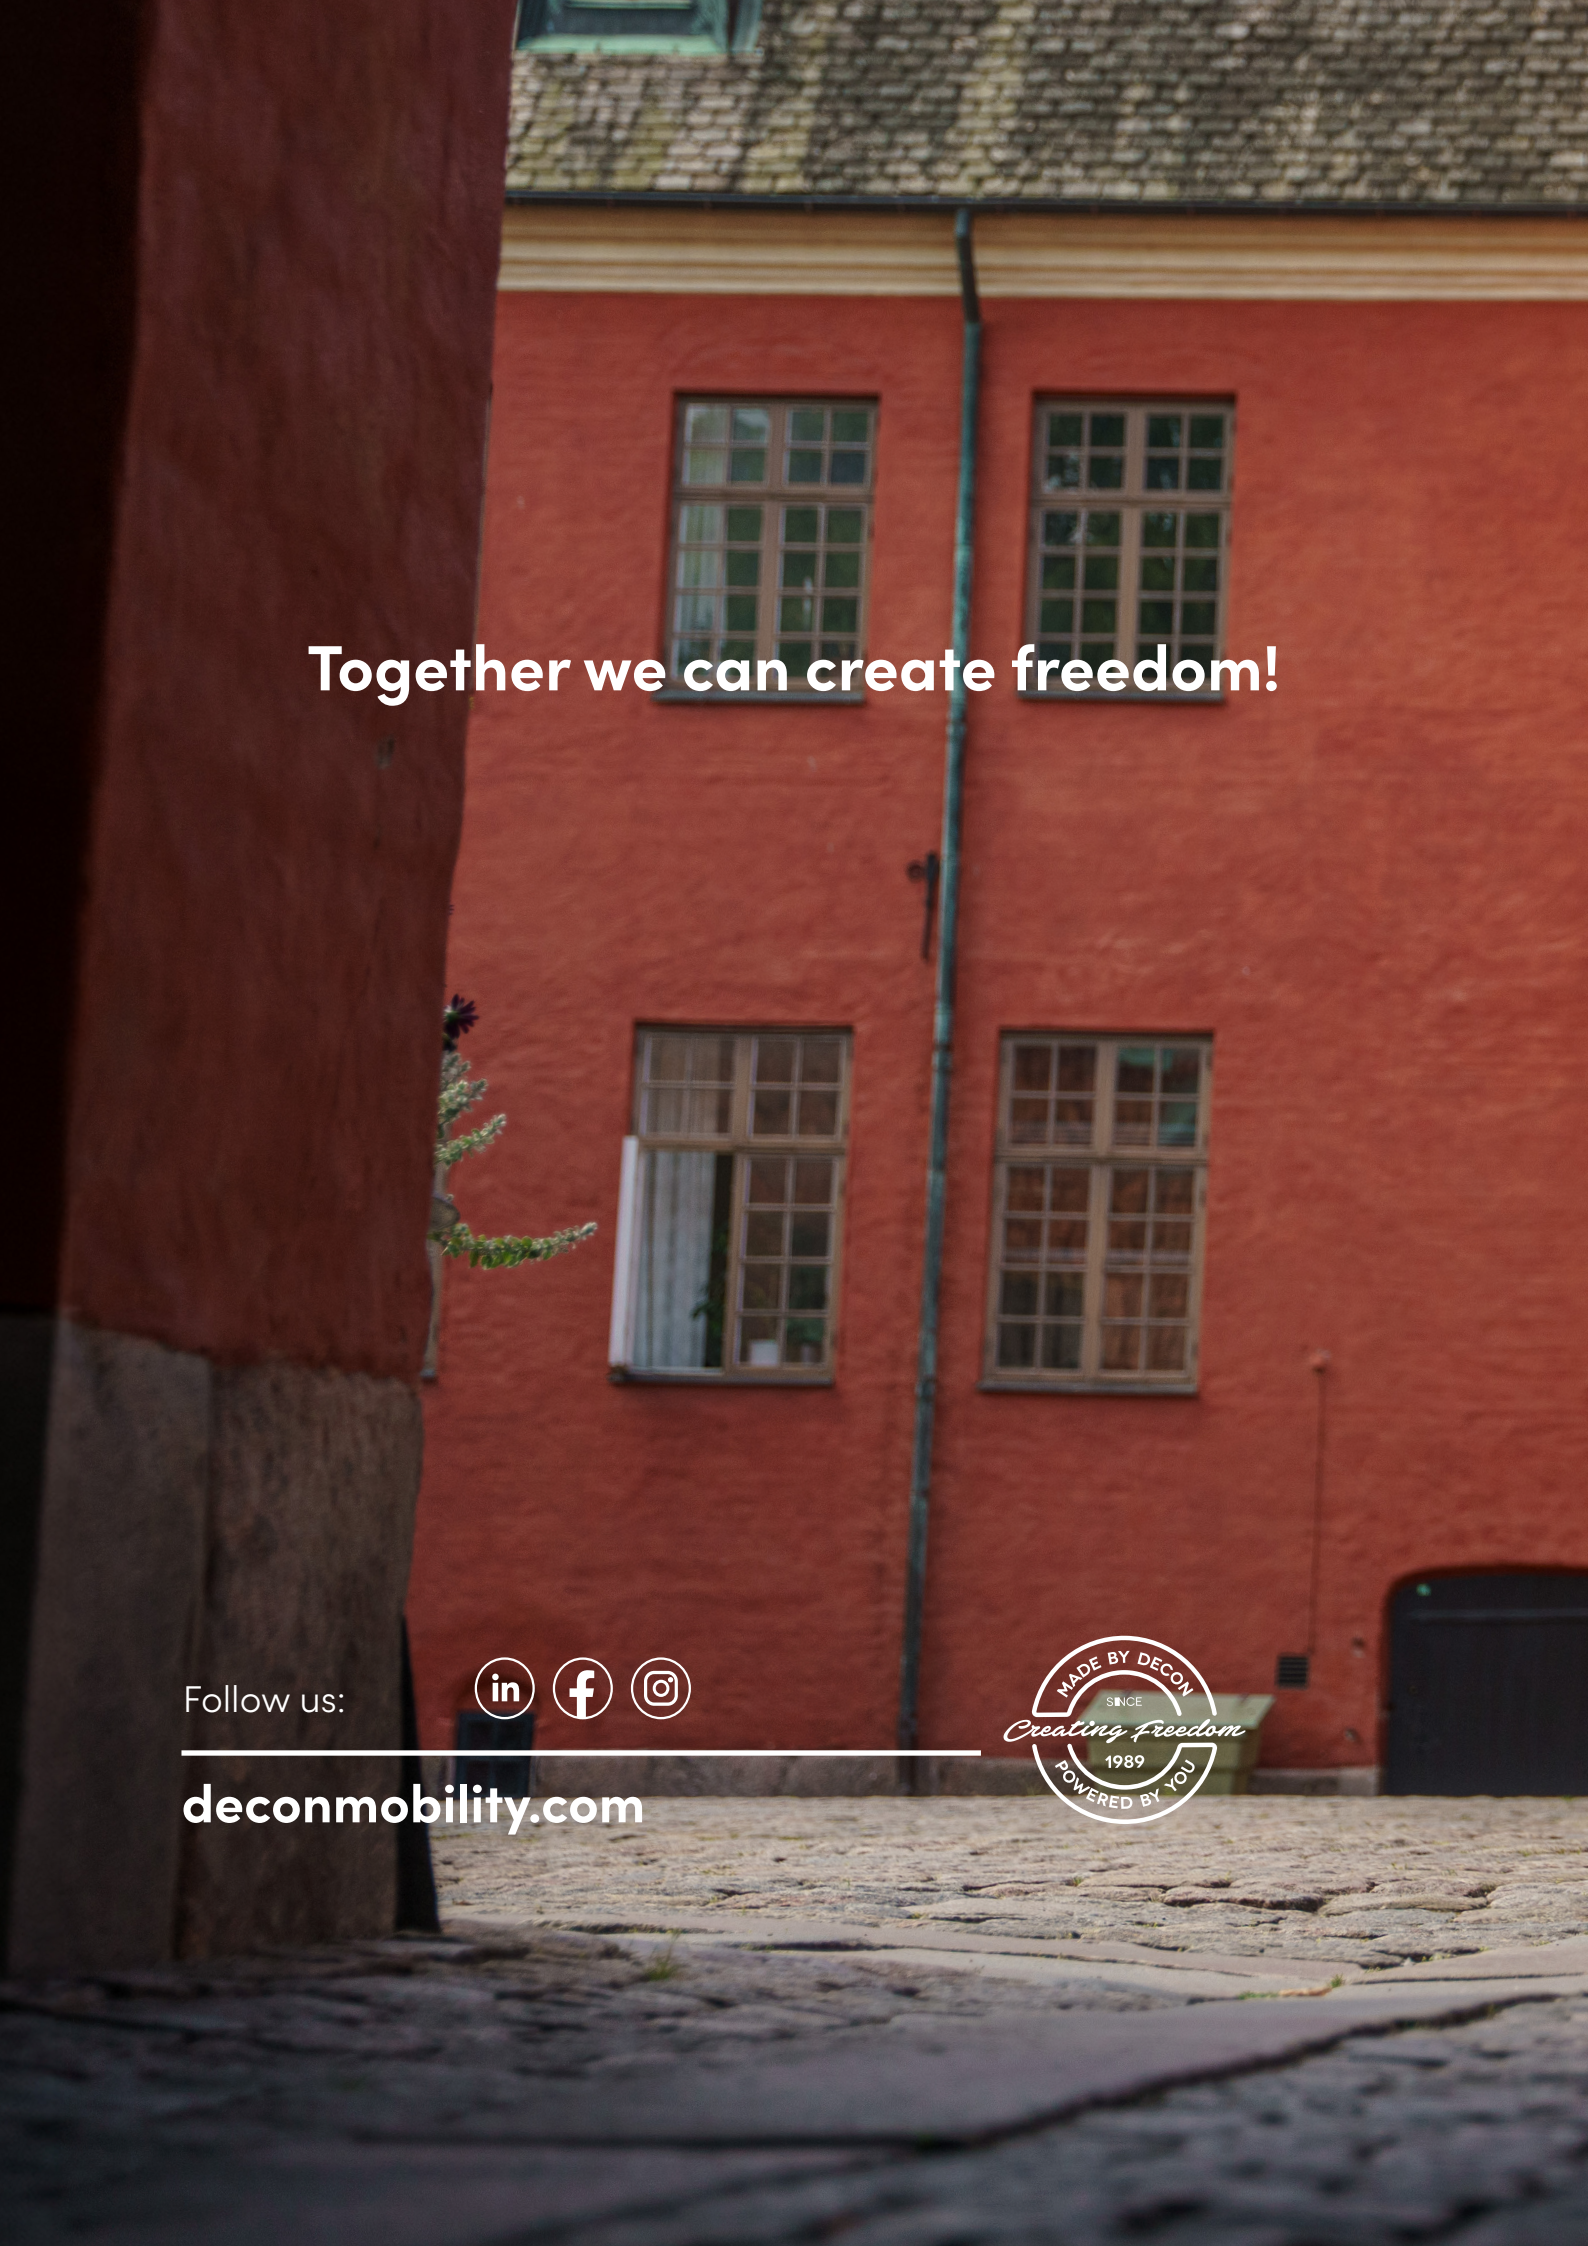

SmartChair Flow is developed with a focus on ease of use, easy transport and well-thought-out functions for everyday use. The compact construction combines stable driving with smart solutions that make the chair easy to handle both at home and while traveling.

The foldable design makes SmartChair Flow easy to transport and store, while several adjustment options contribute to increased comfort and a more individualized seating position. The result is an electric wheelchair that combines freedom of movement, functionality, and ease of use in a modern and flexible design.

As an integrated part of the design, SmartChair Flow is equipped with SmartRolls – a three-wheeled transport system developed to simplify handling and loading. The three-wheeled design helps the chair navigate small changes in level and edges more easily, such as when loading it into the trunk of a car. SmartRolls also has two adjustable positions that can be adapted to different vehicles and trunk heights for smoother and more controlled handling.
