YOMPER
by acekare

Yomper is an electric drive unit that complements your manual wheelchair. Yomper helps and assist you on slopes, uneven grounds or overcoming everyday obstacles.

Sometimes you have to work hard to get over obstacles or up slopes. Over time, these efforts are likely to cause pain, especially in the shoulders. According to clinical studies, 30 to 73% of manual wheelchair users suffer from shoulder pain. Reduce wear and tear and get help in everyday situations.

Yomper adapts to your needs and different situations. Its unique central position makes you almost forget that the Yomper is mounted on your wheelchair. The EasyGo box provides convenient and easy handling, it is easily connected via Bluetooth to Yomper. You can set Yomper in 2 different modes: indoor and outdoor. As an option, there is a care control that can be connected to Yomper. Information about which wheelchair models Yomper can be mounted on can be found on Decon's website, www.decon.se - Adapters.

Specifications

Total weight	6,2 kg
Weight Yomper (excl. battery)	4,65 kg
Max. userweight	150 kg
Battery type	24V10Ah lithium-ion
